This document is a disclosure by HALTEH FINANCIAL GROUP ("Company"), which provides the MetaTrader 4 service to the Client in accordance with the terms of the Client Agreement, of the potential risks associated with trading on financial markets. First and foremost, the Client should be aware of the potential losses associated with this activity. However, due to the vast number of possible scenarios, this document cannot detail all of the inherent risks associated with trading on financial markets. The terms used in this document have the same meaning as those defined in the Regulations, which consist of all the documents found in the "Agreements & Regulatory Documents" section of the Company's website.

Impact of the "Leverage"

- 1.1. Due to leverage, even minor market fluctuations can have a significant impact on a Client's trading account when executing trading operations under margin trading conditions. The Client must be aware that if the market trend is against them, they may lose their initial margin as well as any additional funds deposited to maintain open positions. The Client is solely responsible for all risks, financial resources used, and trading strategies chosen.
- 1.2. We strongly suggest maintaining a Margin Level of at least 1,000% and placing Stop Loss orders in order to limit potential losses.

High Volatility Instruments

- 2.1. Numerous instruments are traded within wide ranges of intraday price fluctuations, so the Client must carefully consider the high probability of both profit and loss.

Technical Threat

- 3.1. The Client assumes the risk of financial loss resulting from the failure of information, communication, electronic, or other systems.
- 3.2. When executing trading operations via the client terminal, the Client assumes the risk of financial loss, which can be caused by: a) the failure of Client hardware, software and internet connection; b) the improper operation of Client equipment; c) the incorrect settings in the client terminal; d) delayed client terminal updates; e) the Client's ignorance of the applicable rules outlined in the MetaTrader User Guide.
- 3.3. The Client acknowledges that during times of peak demand, telephone communication with the duty operator may be difficult, particularly on the fast market (for example, when key economic indicators are released).

Abnormal Market Conditions

- 4.1. The Client acknowledges that, in the event of abnormal market conditions, the execution time for Client instructions may increase.

Trading System

- 5.1. The Client must acknowledge that only one request or instruction may be in the queue at any given time. Once the Client has sent a request or instruction, any subsequent requests or instructions will be disregarded. In the "Order" window, the message "Order is locked" will be displayed.
- 5.2. The Client shall acknowledge that the server for Clients with live accounts is the only reliable source of quoting information. In the event of a poor connection between the client terminal and the server, some of the quotes may never reach the client terminal, rendering the quote database in the client terminal unreliable as a source of quoting information.
- 5.3. The Client acknowledges that when the Client closes the window to place/modify/delete an order, as well as the window to open/close a position, the server-sent instruction or request will not be canceled.
- 5.4. The Client shall assume the risk of executing unplanned transactions if the Client sends a subsequent instruction before receiving the result of the previous instruction.
- 5.5. The Client acknowledges that if an order has already been executed and the Client sends an instruction to modify the level of a pending order and the levels of Stop Loss and/or Take Profit orders, only the instruction to modify the Stop Loss and/or Take Profit levels on the position opened on that order will be executed.

Communications

- 6.1. The Client shall bear the risk of any financial loss resulting from the Client's failure to receive notification from the Company.
- 6.2. The Client shall acknowledge that information transmitted via email without encryption is not protected against unauthorized access.
- 6.3. The Client agrees that the Company has the right to delete messages sent to the Client via internal mail three (three) days after they have been sent, regardless of whether the Client has received them.
- 6.4. The Client is solely responsible for the safekeeping of information received from the Company and assumes the risk of any financial loss resulting from a third party's unauthorized access to the Client's trading account.

Force Majeure

- 7.1. The Client assumes all financial loss risks caused by force majeure.

Statutory Restrictions and Prohibitions

- 8.1. The Client shall assume all financial and other risks when executing operations (or actions related to these operations) on financial markets that are statutorily prohibited or restricted by the law of the Client's country of residence.
